

**ABTRON Corp.**  
is  
**The Solution!**

**Asbestos Abatement  
Mold Remediation  
Demolition  
Renovation**

Abtron Corp is a fully insured New York State, New York City, and Connecticut licensed Asbestos Abatement company. We fully comply with all EPA, OSHA, and state regulations to provide safe, efficient, and proper removal and disposal of all forms of asbestos and mold from all types of structures including residential, commercial, and industrial buildings. Our principals and field supervisors are eminently qualified with years of combined training and experience in the field of building rehabilitation, renovation, demolition, and asbestos and mold removal.

As we are sure you are aware, there have been countless occasions in the recent past where building owners, operators, and management and maintenance personnel have been at a loss to engage properly trained, knowledgeable people to remove potentially dangerous asbestos materials from their structures. In order to fill this void, the people of our firm, who have a unique blend of demolition, restoration, environmental, and asbestos removal expertise, believe that we can offer a service that no other firm in this area can provide.

We stress absolute state-of-the-art safety and care in all of our projects. Our attention to detail will begin for our customers when they receive a thorough, in-depth explanation of the proposed work with a price break down

before any contract for abatement is executed. We employ fully and properly trained and certified mechanics and they work under the constant supervision of our most well qualified supervisors of asbestos removal. We employ independent testing services during and after removal and / or encapsulation to ensure proper safety of conditions at all stages of our work. In short, the single purpose of this firm is to fill the void that now exists. That void is to provide safe, efficient, and reasonably priced encapsulation, removal, and disposal of dangerous or potentially dangerous asbestos materials.

Let the many years of experience of our supervisory personnel instill confidence and relieve you of the fears that can arise during asbestos removal.

Due to the liabilities in this sensitive industry, the advantages of using an experienced and established contractor are obvious. We have created a harmonious working relationship with many companies of different trades.

If you have the need now or in the future for the type of service our firm provides, we hope you will consider us. If you would like more information about our firm and the services we can provide, please let us know and we will have one of our principals meet with you and discuss your problems and needs.

We welcome an opportunity to serve you.
