

USA1500-M Infrared Heater

The Original SUNHEAT USA1500-M electric portable infrared heater is fully made in the USA. The cabinet has a beautiful finish featuring the furniture industry's most popular and trendy wood/stain combinations. The finish is water resistant and so advanced, even permanent marker wipes away with a dry rag! The cabinets, sheet metal, packaging and boxes are all made in local Nebraska facilities. This reliable infrared heater has a direct wiring system for increased longevity and a Honeywell manual thermostat, which lasts longer and saves more than remote controlled digital models, maintaining a cozy warm temperature no matter the elements outside. This unit cannot start a fire and is completely cool to the touch. Even the heat exhaust has our patent pending "Safety Touch" fabric making it safe for little fingers and four-legged friends.
