Model 4600 / Model 5600

These high quality, long lasting underwater lights are U.L. listed and come complete with a 200 W par 46 300 W par 56, or 500 W par 56 sealed beam lamp with tempered glass lens. Lenses are available in seven different colors. A ten foot, heavy duty, three-wire, grounded cord is standard. Additional cord lengths are optional. Light size 7" dia. x 4 1/2" depth for 200 W. and 8 1/4" dia. x 5 1/2" depth for 300 & 500 W. Optional epoxy or brass supporting bases are available with brass swivel brackets which allow a 45 degree tilt. A rock guard is standard to protect the lens from chipping or cracking due to falling rocks or debris.

Electrical Requirements

All electrical requirements are shown on individually detailed installation blueprints.

All circuits are designed for 50/60 Hz applications.

All electrical units must be installed in accordance with local and/or National Electrical Code® requirements by a licensed electrical contractor.

Bronze submersible junction boxes provide watertight sealing of electrical connections.
