

Black Negligee Snakeroot

(*Actaea simplex* 'Black Negligee')

Perennial

**5' - 6' Tall (With
Flowers)**

1.5' - 2' Wide

**Bloom Time:
Fall**

0 - 4 Hours

Zones 3 - 9

The Black Negligee Snakeroot is a striking and dramatic perennial that commands attention in any garden or landscape. Its glossy, dark purple to nearly black foliage forms an elegant, upright clump, creating a bold contrast against lighter-colored plants. In late summer to early fall, it produces delicate, airy clusters of small white to pale pink flowers that rise above the dark leaves, adding a subtle yet enchanting touch of color.
