(*Asclepias tuberosa* 'Gay Butterflies')

Perennial

2' - 3' Tall

2' - 3' Wide

**Bloom Time:
Summer**

4 + Hours

Zones 4 - 11

Gay Butterflies Milkweed is a compact and colorful variety of Butterfly Weed, known for its bright, vibrant orange flowers that attract pollinators, particularly butterflies. The plant produces clusters of striking, star-shaped flowers that bloom profusely in the summer, providing a splash of color in any landscape. The foliage consists of narrow, lance-shaped green leaves, which serve as a backdrop to the stunning blossoms.
