

Swamp Milkweed

(*Asclepias incarnata*)

Perennial

3' - 5' Tall

2' - 3' Wide

**Bloom Time:
Summer**

4 + Hours

Zones 4 - 9

Swamp Milkweed is a native perennial known for its graceful habit, fragrant blooms, and value to pollinators. Upright stems are lined with narrow, deep green leaves, forming a clump that adds height and texture to garden beds. In mid to late summer, rounded clusters of soft pink to rose-colored flowers appear, releasing a light vanilla-like fragrance and drawing bees, butterflies, and other beneficial insects.
