

Karl Foerster Feather Reed Grass

(Calamagrostis x acutiflora 'Karl Foerster')

Perennial Grass

3' - 5' Tall

2' Wide

4 + Hours

Cutback In Spring

Zones 4 - 10

Karl Foerster Feather Reed Grass is popular, and for a good reason. Give it mostly full sun and it will grow. It prefers consistently moist soil, but will grow in clay and drier soils as well. The upright, tight growth habit of this grass adds an architectural element to any landscape. Good for urban plantings, borders, erosion control, stream banks, and more.
