

# Lightning Strike® Feather Reed Grass

*(Calamagrostis hybrid 'Lightning Strike')*

**Perennial Grass**

**2' - 3' Tall**

**1' - 2' Wide**

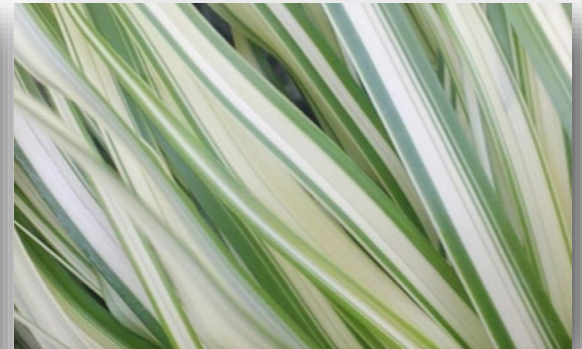

**Full Sun**

**Cutback in Spring**

**Zones 4 - 9**

Lightning Strike Feather Reed Grass is known for its unique variegated foliage, which features green leaves with striking golden-yellow vertical stripes. Like other Feather Reed Grass cultivars, Lightning Strike typically forms upright clumps of slender, arching foliage. In the late summer to early fall, it produces feathery, pink-tinged flower plumes that rise above the foliage. These plumes gradually turn golden brown as they age, adding texture and movement to the garden.
