

# Blue Waterfall Bellflower

(*Campanula poscharskyana* 'Camgood' USPP13161)

**Perennial**

**8" - 12" Tall**

**18" - 24" Wide**

**Bloom Time:  
Summer**

**4 + Hours**

**Zones 4 - 7**

Blue Waterfall Bellflower is a graceful, cascading perennial prized for its prolific display of cool lavender-blue blooms and its naturally trailing habit. From late spring through mid-summer, masses of starry, bell-shaped flowers spill along slender stems, creating a soft waterfall effect over rock walls, containers, and the edges of garden beds. Its compact, spreading form develops into a dense mat of fresh green foliage that stays neat and attractive throughout the growing season.
