

# Umbrella Catalpa

*(Catalpa bugnei 'Nana')*

**Ornamental Tree**

**10' - 15' High**

**10' - 15' Spread**

**Growth  
Fast**

**4 + Hours**

**Spring Blooming  
Understory**

**Zone 5 - 8**

The Umbrella Catalpa is a distinctive deciduous tree prized for its compact size and symmetrical, umbrella-shaped canopy. Unlike its larger relatives, the Umbrella Catalpa rarely flowers or produces seed pods, focusing its charm on its architectural form and vibrant foliage. The Umbrella Catalpa's tidy, compact habit and unique silhouette make it a favorite for adding structure and visual interest to landscapes.
