

Crimson Comet Buttonbush

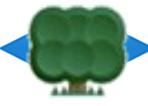

(*Cephalanthus occidentalis* 'SMCBM')

Shrub

6' - 10' High

6' - 10' Spread

4 + Hours

**White Flowers
Red Fruit**

Zone 5 - 9

refined selection of native buttonbush valued for its ornamental flowers and adaptable nature. In early to mid-summer, distinctive spherical blooms appear, composed of creamy white petals highlighted by prominent protruding stamens that give the flowers a pincushion-like form and light fragrance. Glossy green foliage creates a clean, attractive habit throughout the growing season, followed by a bright red fall color.
