Shade Tree

15' - 20' High

20' - 25' Spread

**Growth
Moderate**

4 + Hours

**Purple Foliage
Pink Flowers**

Zone 5 - 9

Forest Pansy Redbud is a highly ornamental, deciduous small tree prized for its striking foliage and early spring flowers. In spring, before the leaves unfurl, its bare branches are covered with clusters of rosy-pink, pea-like blossoms, creating a vibrant early season display. Once the foliage emerges, heart-shaped leaves open in rich purple-red tones that may mellow to a deeper maroon or purple-green through the summer, providing continuous color and texture in the landscape.
