

# Weeping Alaskan Cedar

(*Chamaecyparis nootkatensis* 'Glauca Pendula')

**Evergreen Tree**

**25' - 30' High**

**10' - 15' Spread**

**Growth Moderate**

The Weeping Alaskan Cedar's branches are long and drooping, giving the tree a soft and flowing appearance. Its needles are a deep shade of green and emit a sweet, resinous fragrance when crushed. The bark of the Weeping Alaskan Cedar is reddish-brown and has a rough, scaly texture. Whether planted as a specimen tree or as part of a larger landscape, the Weeping Alaskan Cedar is sure to impress and delight anyone who encounters it.

**4 + Hours**

**Zone 4 - 7**
