4 + Hours

**Red New Growth
Pollinator**

Zone 4 - 8

Burgundy Lace Filbert is a striking ornamental tree prized for its finely cut, lace-like foliage and rich burgundy coloration. Emerging in spring with deep wine-red tones, the leaves mature to a dark purple-bronze that holds well through summer, creating dramatic contrast in the landscape. In late winter to early spring, soft pinkish catkins appear, adding seasonal interest before the foliage emerges.
