

Kodiak® Red Honeysuckle

(*Diervilla sp.* 'G2X885411' USPP28403)

Shrub

3' - 4' High

4' - 5' Spread

**0 - 8 Hours/Full
Sun or Full Shade**

**Red New Growth
Yellow Flowers**

Zone 4 - 7

Kodiak® Red Honeysuckle is a compact, resilient shrub admired for its multi-season color and dependable landscape performance. Spring brings new growth flushed in deep burgundy that softens to green accented by fresh red tips, before transforming into a striking, fiery red display in the fall. In early to midsummer, the plant produces clusters of small, tubular yellow flowers that attract bees, butterflies, and other pollinators.
