

Kodiak® Black Honeysuckle

(*Diervilla rivularis* 'SMNDRSF' USPP27550)

Shrub

3' - 4' High

3' - 4' Spread

**0 - 8 Hours/Full
Sun or Full Shade**

**Dark Foliage
Yellow Flowers**

Zone 5 - 7

Kodiak® Black Honeysuckle is a versatile shrub growing in full shade to full sun. It produces yellow flowers in the summer popping against the dark foliage. Kodiak® Black Honeysuckle does not spread like the native variety. A great shrub to add contrast to a landscape. Growing in the shade the foliage will not be as dark as in full sun.
