

# Red Yucca

*(Hesperaloe parviflora)*

**Shrub**

**3' - 4' High**

**3' - 4' Spread**

**4 + Hours**

**Red Flowers**  
**Drought Tolerant**

**Zone 5 - 11**

Red Yucca is a striking, drought-tolerant perennial valued for its arching, narrow blue-green leaves that form an attractive, evergreen rosette. In late spring through summer, tall, slender flower spikes rise above the foliage, bearing clusters of tubular, coral-red to pink flowers that attract hummingbirds and pollinators.
