

Skyrocket Juniper

(*Juniperus scopulorum* 'Skyrocket')

Evergreen Tree

12' - 16' High

2' - 4' Spread

Growth Moderate

4 + Hours

Zone 4 - 9

The Skyrocket Juniper has a stately, columnar form that makes this likely the narrowest juniper available. It is so narrow and upright, in fact, it resembles a skyrocket! A durable and versatile evergreen with beautiful bluish green foliage, it works well grouped to form a colorful screen, or alone as a garden accent in a mixture of conifers. Requires very little care, once established.
