

# Tulip Tree

(*Liriodendron tulipifera*)

**Shade Tree**

**60' - 80' High**

**30' - 50' Spread**

**Growth  
Fast**

**4 + Hours**

**Unique Foliage  
Golden Fall Color**

**Zone 4 - 9**

The Tulip Tree is a unique tree in Iowa, and it is gaining popularity. The Tulip Tree is named after its large uniquely shaped leaves and solitary flowers, which both resemble tulips. It is a fast growing tree that can reach a height of up to 80'. It has a relatively narrow shape, because it puts on height much faster than width. It is quite adaptable and loves wet soil. The Tulip Tree also has a nice yellow fall color, so it adds interest year round.
