

# Golden Moneywort

(*Lysimachia nummularia* 'Aurea')

**Groundcover**

**2" - 4" Tall**

**12" - 24" Wide**

**Bloom Time:  
Summer**

**4 + Hours**

**Zones 4 - 9**

Golden Moneywort is a vibrant, fast-spreading groundcover treasured for its brilliant foliage and ability to brighten even the dimmest corners of the garden. Its trailing stems form a low, cascading mat of rounded, coin-shaped leaves in glowing chartreuse to golden-yellow, creating a luminous effect that stands out beautifully against darker plants. In late spring to early summer, small, cup-shaped yellow flowers appear among the foliage, adding subtle charm without overshadowing its bold color.
