

# Sugar Tyme® Crabapple

(*Malus 'Sutyzam'*)

**Ornamental Tree**

**15' - 20' High**

**10' - 15' Spread**

**Growth  
Moderate**

**4 + Hours**

**Spring Blooming  
Wildlife Forage**

**Zone 4 - 7**

Sugar Tyme® Crabapple forms fragrant and showy blossoms in mid to late spring. The blossoms are borne in clusters and cover the tree, creating a breathtaking display. Following the flowers, the Sugar Tyme® Crabapple produces small fruits that are bright red color, adding visual interest to the tree. They persist throughout fall and, if not consumed by birds, can provide winter interest.
