**Spring Blooming
Heavy Producing**

Zone 5 - 8

Pink, spring flowers are followed by bright red apples with a sweet, juicy flavor that sets Tasty Red™ apart from others in the Fruit Snacks™ program. Clean and crunchy in texture, and slightly tart, they are excellent for back yard eating and baking. Tasty Red™ is a heavy producing tree whose apples usually ripen in September. These apples can be picked for a month and due to their sub-acidic profile, they store well for later use. **Pollinators: (Fruit Snacks Varieties) All Red, Blushing Delight, Golden Treat, Tangy Green, Sweet Tart.**
