

# Missouri Evening Primrose

*(Oenothera macrocarpa)*

**Perennial**

**6" - 12" Tall**

**18" - 36" Wide**

**Bloom Time:  
Summer**

**4 + Hours**

**Zones 4 - 8**

Missouri Evening Primrose is a radiant, low-growing perennial treasured for its brilliant yellow blooms and ability to thrive in tough, sunny conditions. Forming a tidy mat of silvery-green, lance-shaped foliage, it spreads gently along the ground, making it ideal for rock gardens, slopes, and hot, dry borders. In late spring to early summer, large, cup-shaped flowers open in glowing lemon-yellow, often unfurling in the evening or early morning and attracting nighttime pollinators with their luminous color.
