

# Montmorency Cherry

(*Prunus cerasus 'Montmorency'*)

**Fruit Tree**

**15' - 20' High**

**8' - 10' Spread**

**Growth  
Moderate**

**4 + Hours**

**Spring Blooming  
Tart Fruit**

**Zone 5 - 8**

The Montmorency Cherry is America's most popular **tart** cherry variety. It produces medium-large fruit early in the season. Montmorency cherries are great for baking and jams. The Montmorency Cherry is self pollinating but will produce more fruit with a pollinator. **Pollinators: Bing, Black Tartarian, Brook's, North Star, Stella, Tulare, and Van Cherry.**
