

# Mount Royal Plum

(*Prunus domestica* 'Mount Royal')

**Fruit Tree**

**10' - 15' High**

**10' - 15' Spread**

**Moderate**

**4 + Hours**

**Self Pollinating  
August Harvest**

**Zone 4 - 7**

Mount Royal Plum is a hardy, self-fertile European plum variety prized for its delicious fruit and compact size. In spring, it produces clusters of fragrant white blossoms, which not only enhance its ornamental appeal but also attract pollinators to the garden. The fruit is excellent for fresh eating, baking, preserves, and drying as prunes.
