

Stella Sweet Cherry

(*Prunus avium 'Stella'*)

Fruit Tree

12' - 15' High

12' - 15' Spread

**Growth
Moderate**

4 + Hours

**Spring Blooming
Early Harvest**

Zone 5 - 8

Stella Sweet Cherry blooms fragrant white flowers in the spring followed by the sweet fruit around late June to early July. The cherries are large, heart-shaped, and have a deep red color. Stella Sweet Cherry is considered self pollinating but will produce more fruit with a different variety planted in the same area.
