

High Contrast Lungwort

(*Pulmonaria* 'High Contrast')

Perennial

8" - 10" Tall

12" - 18" Wide

**Bloom Time:
Spring**

0 - 4 Hours

Zones 4 - 9

High Contrast Lungwort is a striking perennial prized for its vibrant, early-season flowers and uniquely patterned foliage. In early spring, it produces clusters of bell-shaped blooms in vivid shades of deep pink and bright blue, creating a lively, eye-catching display that attracts early pollinators. Its textured, silver-mottled leaves offer bold contrast, making the foliage almost as ornamental as the flowers themselves and providing interest long after the blooms fade.
