

# Prairie Stature® Oak

(*Quercus x bimundorum* 'Midwest')

**Shade Tree**

**30' - 50' High**

**30' - 40' Spread**

**Growth  
Slow**

**4 + Hours**

**Hardwood  
Red Fall Color**

**Zone 3 - 7**

Prairie Stature® Oak is a hybrid between the English Oak and White Oak founded at Iowa State University. The emerald green foliage turns a reddish color in the fall and will stay on the tree throughout the winter. Prairie Stature® Oak has been documented to grow around 1-1.5 feet a year. A great tree to provide dense shade and interest in any yard.
