Shade Tree

20' - 30' High

15' - 20' Spread

**Growth
Fast**

4 + Hours

**Curled Branches
Gold Fall Color**

Zone 5 - 8

Corkscrew Willow is a distinctive ornamental tree known for its twisted, spiraling branches that add bold texture and visual interest year-round. The contorted limbs are especially striking in winter, creating dramatic architectural appeal even after the leaves have dropped. Narrow, bright green leaves emerge in spring and lend a soft, graceful look through summer, turning yellow before falling in autumn.
