

Little Bluestem

(Schizachyrium scoparium)

Iowa Native

Perennial Grass

2' - 4' Tall

1.5' - 2' Wide

4 + Hours

Cutback in Spring

Zones 4 - 9

Little Bluestem is a compact, native ornamental grass prized for its fine texture and striking seasonal color. It forms tidy, upright clumps of blue-green foliage that typically grow 2 to 4 feet tall and turn brilliant shades of copper, orange, and red in fall. In late summer, soft, silvery seed heads rise above the foliage, adding light movement and winter interest.
