

# Prairie Dropseed

*(Sporobolus heterolepis)*

Iowa Native

**Perennial Grass**

**2' - 3' Tall**

**2' - 3' Wide**

**4 + Hours**

Prairie Dropseed offers mounding tufts of green on a soft, serene scene. In autumn, this clump-forming grass takes on warm tan colors. Tall flower spikes grow above the foliage in late summer. It is a low maintenance grass; simply cut back once a year. It has many uses: native gardens, meadows, rock gardens, and many more. It gives a formal look when planted in mass.

**Zones 3 - 9**
