**Fragrant Blooms
Yellow Fall Color**

Zone 3 - 7

The Ivory Silk Japanese Tree Lilac makes for a spectacular ornamental tree in any landscape. Large, fluffy, ivory-colored panicles bloom in June, and are very fragrant. It is also one of the easiest lilacs to grow, it has good resistance to powdery mildew, scale, and borers. It also has good tolerance for urban conditions and is deer resistant. It grows best in moist, well drained soils. It tolerates clay and a variety of pH levels.
