

# Princeton Elm

(*Ulmus americana* 'Princeton')

**Shade Tree**

**50' - 75' High**

**30' - 50' Spread**

**Growth  
Fast**

**4 + Hours**

**Dense Shade  
Strong Branching**

**Zone 3 - 8**

The Princeton Elm has a great shade producing canopy for a faster growing tree. This large tree presents good resistance to Dutch elm disease and demonstrates resistance to elm beetles as well. This fast growing shade tree is tolerant to adverse conditions, so it is a great roadside or commercial tree. It has a yellowish orange fall color.
