

Dwarf European Cranberry Viburnum

(*Viburnum opulus 'Nanum'*)

Shrub

2' - 3' High

2' - 3' Spread

2 + Hours

**White Flower
Red Fall Color**

Zone 4 - 8

Dwarf European Cranberry Viburnum is a compact variety of viburnum with loads of color. The new growth emerges red and fades to green. It blooms white lace cap flowers in the summer. Red berries follow the flowers and provide forage for wildlife. The Foliage turns an intense red in the fall. A great shrub to use as a small hedge or to plant along foundations.
