*(Vitis labrusca 'Concord')*

**Fruit**

**5' - 6' High**

**8' - 10' Spread**

**4 + Hours**

**Popular Variety**  
**Midseason Harvest**

**Zone 5 - 9**

Concord grapes are prized for their sweet, juicy flesh and distinctive, floral aroma. They are perfect for eating fresh or for use in a variety of culinary applications, such as making jams, jellies, and wine. The grapes ripen in mid to late season, typically around September to October, and are easily harvested by hand.
