

Mars Seedless Grape

(*Vitis vinifera* 'Mars')

Fruit

6' - 8' High

6' - 8' Spread

4 + Hours

**Seedless
Midseason Harvest**

Zone 5 - 8

Mars grapes are prized for their sweet, juicy flesh and rich, fruity flavor. They are perfect for eating fresh, making juice, or for use in a variety of culinary applications, such as making jams, jellies, and wine. The grapes ripen in mid to late season, typically around September to October, and are easily harvested by hand.
