

Hardy Rubber Tree

(Eucommia ulmoides)

Shade Tree

40' - 60' High

25' - 35' Spread

**Growth
Slow**

4 + Hours

**Unique Bark
Yellow Fall Color**

Zone 4 - 7

The Hardy Rubber Tree is well-known for its tough, leathery leaves that resemble those of the elm, which provide a lush, green canopy in summer. One of the most distinctive characteristics of the Hardy Rubber Tree is its bark, which produces a natural latex-like sap, similar to rubber. In the fall, its foliage turns yellow, adding seasonal interest.
