

Worplesdon Sweetgum

(Liquidambar styraciflua 'Worplesdon')

Shade Tree

50' - 60' High

30' - 40' Spread

**Growth
Moderate**

4 + Hours

**Spring Blooming
Maple Alternative**

Zone 5 - 8

The Worplesdon Sweetgum is known for its large, glossy, five-lobed leaves that turn a beautiful red, purple, and gold in the fall. It also produces small, spiky fruit that are often referred to as "gumballs" or "burr balls". They are tolerant of a range of soil types, including clay, loam, and sand. A great shade tree to add diversity to the neighborhood.
