

# Marmalade<sup>®</sup> Potentilla

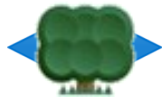

(*Potentilla fruticosa* 'Jefmarm' USPP31663)

**Shrub**

**2' - 3' High**

**2' - 3' Spread**

**4 + Hours**

**Prolific Bloomer  
Compact Size**

**Zone 2 - 6**

Marmalade<sup>®</sup> Potentilla boasts a striking display of golden-yellow to orange flowers with coppery-red undertones, giving it a marmalade-like appearance. The flowers bloom abundantly from late spring through fall, often continuing into the first frost. The shrub's small, medium green, pinnate leaves provide a fine-textured backdrop to the colorful blossoms.
