

Bloomerang Purpink® Lilac

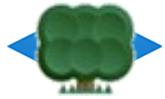

(*Syringa x pubescens* 'SMNSPTP' USPP35123)

Shrub

3' - 5' High

2' - 3' Spread

4 + Hours

**Fragrant Flowers
Reblooming**

Zone 3 - 7

What sets the Bloomerang Purpink Lilac apart is its remarkable reblooming capability. Like traditional lilacs, it produces clusters of fragrant, lavender-pink flowers in spring. However, unlike conventional varieties, it also blooms again later in the summer and continues sporadically until frost, providing multiple waves of delightful color and fragrance throughout the growing season.
