ADVANTAGES

- Ergonomic, Compact and Safe Long Tiller Design
- Reliable and Strong Chassis
- Powerful, Maintenance Free German AC Power Train
- Core Components from Top Quality Brands

PT35L/45L-2748

German AC drive technology

The powerful German Schabmueller maintenance free AC Drive motor in combination with the German Kordel gearbox, Intorque brake and Wicke drive wheel give best performance, efficiency and reliability to reduce the running costs!

Whatever desired, the AC Drive gives always the right response: gentle or fast acceleration.

CANBUS technology

The CANBUS technology is due to less wiring more reliable. For maintenance the CANBUS technology makes analysis and adjustments easier so that the downtime is lower than for trucks without CANBUS. Digital signals further makes parts longer lasting than analogue signals.

CAN-BUS

Maintenance friendly

The trucks design and the used components are tailored to make service and maintenance easy. All components are easy to reach when removing the main cover only with 2 screws, drive- and castor wheel are easy to exchange without craning the truck.

Long tiller design for ergonomics and safety

In particular through the long tiller design the operator can always keep a safe distance to the truck during proceeding the work very ergonomically.

The design ensures lower operational forces than trucks with a short tiller. The tillers operating height is naturally positioned to ergonomic, operator friendly controlling positions.

Robust and reliable design

The robust chassis with the strong 0.31 inch thick apron protects the truck and the components against mechanical impacts from the outside.

In combination with the strong metal battery cover, the truck is well- equipped to reduce service work and damages to a minimum.

Dirty floor environments have less influence to the vertical AC motor design as the components and the brake are out of the reach of direct impacts. IP 54 protected controller, safe against dust and splash water.

Long lasting battery capacities

With the PT-L series for every application the right battery:

- PT35L-2748 with 165 Ah 2VBS battery with very short truck length and maneuverability for restricted operating areas.
- PT45L-2748 with 210Ah DIN 2PzS battery

Optional sideways battery exchange compartment for PT45L-2748 with 210Ah battery.

Various options

- Load backrest
- Sideways battery exchange
- Different fork-versions on request

Entry rollers as standard.

PT35L/45-2748

Long-tiller Walkie Electric Pallet Truck

INTRODUCTION

The PT35L/PT45L-2748 series is the first choice for loading and unloading as well for universal transportation on short distances with capacities from 3500 lbs up to 4400 lbs.

With the short chassis length (PT35L-2748) the truck is tailored to operate in confined areas.

With its high-quality and state of the art top-brand components and technologies, the truck competes with leading well-know brands in the market.
