

Bed Bug Preparation Requirements

- Remove all bedding from your bed (sheets, blankets, pillow cases, etc.)
- **Machine-wash (before treatment)** the bedding using the hottest cycle, and machine-dry the items for at least 45 minutes. Bag and seal the items or place in a sealed container until after the first treatment.
- Empty all nightstands, dressers or tables that are close to where you sleep. Box these belongings until after the first treatment. Remove and wash curtains near where you sleep.
- **Arrange for the removal of pets during treatment.**
- **Arrange for the family to be out of the home for 3 hours**
- Eliminate clutter. If you are throwing out any items, it's best to do so on your trash day.

We will handle the rest, the moving and treatment of furniture and beds, all flooring and baseboards treated. The prep will have to be done for the first and second treatment.
