CAT

Bring previous recorders or provide us
with where to get them

When was your cat last:

Leukemia and FIV tested

Fecal checked

Upper Respiratory vaccine

Leukemia vaccine

Rabies vaccine

Treated with Flea, Tick, Heartworm
prevention

We believe vaccinations should fit the pet's lifestyle.

Core dog vaccines against deadly disease: Distemper, Parvo, Hepatitis, Leptospirosis
(DHLP), Rabies

Core cat vaccines: Upper respiratory (FVRCP Feline viral rhinotracheitis, calici virus and
panleukopenia) Rabies

Different lifestyles may need further protection.

As pets reach middle age, about 6 years old, we recommend labwork panels to be sure to
catch any disease states early- easier on your pet, less expensive for you.

Also available: Glaucoma screen to catch and treat this painful problem

EKG for heart rhythm

Call us if you have ?s (513) 732-1116
