

THE #1 CONCERN OF GLP-1 USERS IS LOOSE AND SAGGING SKIN**

Yet the majority of patients are not using any products to address these specific facial concerns.**

A note from DR. MARC RONERT

"I developed VOL.U.LIFT as a solution specifically to address GLP-1/GIP facial aging. Each ingredient is intentionally selected to address the distinct range of concerns that accompany these treatments."

**Data as collected from NewBeauty's x BeautyEngine x IMAGE Skincare survey dated December 2024

Hydration increased by

21.8%

DENSITY
Net elasticity increased by

23.2%

Firmness increased by

22.5%

KEY INGREDIENTS

DEFLECTION

L-ORNITHINE AMINO ACID:

Visibly plumps skin, improving the appearance of sunken, deflated skin and promoting a fuller, younger-looking face

DEEP WRINKLES

BAKUCHIOL:

Visibly reduces lines and wrinkles, improving the appearance of skin firmness and texture quality

DEHYDRATION

HA SILANOL:

Next generation hyaluronic acid combined with silicium improves hydration, plumping the appearance of skin to restore the appearance of volume

DENSITY

PLANT COLLAGEN FRAGMENTS:

Biomimetic to human collagen fragments, plant collagen fragments visibly lift skin, improving sagging and deflated skin

DENSITY

KANGAROO PAW PLANT EXTRACT:

Rich in ferulic acid and linoleic acid, Kangaroo paw extract helps to visibly firm skin, reducing the appearance of sagging, lines and wrinkles

*Based on a 12-week clinical study of 29 participants ages 35 – 65, who have experienced weight loss due to the use of one of the following GLP-1 agonists, GIP, other weight loss promoting drugs or gastric bypass surgery, with twice daily application of VOL.U.LIFT. Study data on file with Image International Manufacturing, LLC
