Service Solutions

## Employees of the Month:

Congrats to Amber who was named our September Employee of the Month! She works in our CSR department and is the one behind dispatching all of those yellow vans!

## Coupon of the Month:

**Free:** Unclog your Drain for Free with any Drain Cleaning Estimate!

## JHCC In Pictures:

## JHCC Spreads Warmth Through "Feel the Love"

John H. Coleman Company was honored to partner with Lennox for the annual *Feel the Love* campaign—a program that recognizes and supports individuals who go above and beyond for their community. Each year, Lennox donates a complete HVAC system to a deserving recipient, and our team proudly donates their time and expertise to install it.

This year's recipient was **Ms. Mollie Green**, a remarkable woman known for her faith, compassion, and lifelong dedication to teaching. Ms. Mollie has traveled around the world sharing Bible lessons and even learned sign lan-

guage to reach and teach more people. Her friend Jason described her best: *"She has always been an outstanding example of faith, self-sacrifice, and scholarship... her work in our congregation is something to be admired."*

After experiencing recent health challenges that made it difficult for her to continue working, Lennox and John H. Coleman Company were thrilled to help meet one of her basic needs—providing her home with reliable heating and cooling comfort.

Our installers, **Jacob and Adam**, did an outstanding job completing the installation, and several local news

stations came out to capture the heartwarming story. In true Ms. Mollie fashion, she thanked everyone with homemade banana bread—a sweet reminder of the love and gratitude that filled the day.

## The Shocking Truth about Space Heaters

When the chill of fall sets in, a space heater can seem like a quick fix for warmth—but be careful! These small devices are responsible for thousands of house fires each year. Always keep them at least three feet from anything flammable, plug them directly into a wall outlet

(never an extension cord), and turn them off when you leave the room. And remember—nothing warms your home as safely and efficiently as a properly running furnace. Our team is always here to help keep your system ready for the season ahead!
