August Newsletter

Be in Love with your smile this season!

How often do you try to hide your beautiful smile?

If your smile is making you insecure, learning about the cosmetic dentistry services available to you might help.

And there's many more where that came from! Call our office at (770) 304-0034 or visit our website at amazingsmilespc.com to learn more!

Fall in love with your smile... ...Dental Bonding

Dental bonding is a simple, safe, and effective procedure that uses the same composite material as fillings to repair the appearance of your teeth. We use composite resin for dental bonding (and fillings) because it is similar to the color your tooth and thus looks more natural.

This patient didn't like the discoloration and raggedness on the bottom of their teeth. Using dental bonding, we were able to give them the smooth smile they desired.

This procedure is used to repair chipped, cracked, and sometimes even broken teeth. It can also be used to fix the appearance of discolored teeth, gaps between teeth, and even lengthening a tooth that appears shorter than the rest.

If you have any of these issues, a quick dental bonding procedure could be the affordable fix you're looking for. Schedule an appointment to discuss your cosmetic concerns today, and see if dental bonding can be a solution for you!
