

STORM SHIELD™

HURRICANE PROTECTION EST 1994

By **ZAGER**

5 Year Limited Warranty

Operation

It is important that you open and close your shutters at least once a month. This will help keep your tracks clear and blades moving smoothly.

Upkeep

2-4 times a year, apply graphite spray, and/or wax spray in the upper tracks, paying special attention to the wheels. After spraying, open and close the shutters to ensure the lubricant is distributed.

Cleaning

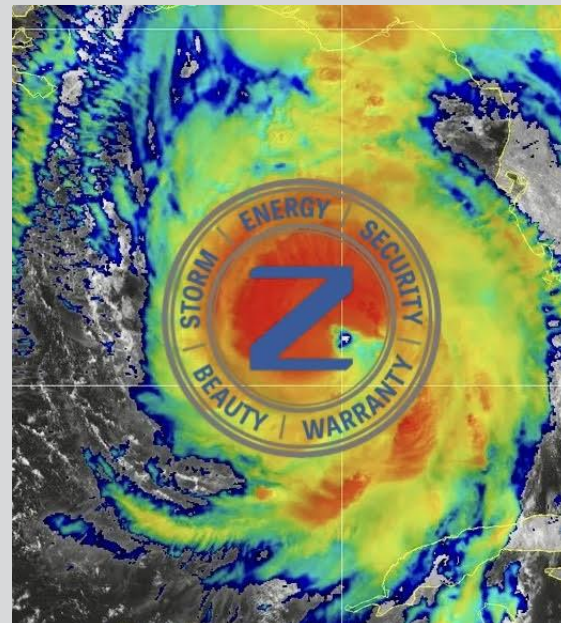

First, ensure debris is removed from the upper and lower tracks. We recommend tracks are washed with a mild soap solution and a soft cloth or fine-haired brush every three months to remove any dirt, salt, or sand.

What to Use

Use a low PH level soap, such as automobile soap. Avoid cleaners that have vinegar, citrus, sodium bicarbonate, solvents, or high PH. Once you have cleaned the shutter, ensure all surfaces are rinsed with clear water and dried with a soft absorbent cloth.

Do Not Use

- Abrasive Cleaners
- Sharp blades such as razors or paint scrapers
- Mineral Spirits or solvents of any kind
- WD-40

Clear Storm Panels

Clear Polycarbonate Storm Panels offer a transparent, yet protective, hurricane solution. They are highly effective against wind and impact, aesthetically pleasing with their clear design. The panels are made from polycarbonate and are designed to withstand high winds and flying debris, exceeding Florida Building Code requirements.

Armor Screen Hurricane Protection

Grommet System or Buckle and Strap Systems

Armor Screen is Transparent, Easy to install and store, Lightweight and Unbelievably Strong. All Armor screen systems are Miami-Dade and Florida Building Code approved. Each is tested to 165 PSF (equivalent to 257 MPH) as well as impervious to Ultra Violet Radiation. Zippers are available.

Accordion Shutters

Whether a Category 5 hurricane or an intruder, our accordion shutters have you covered. Our robust accordion traces lock your shutters in place, making it one of the most secure in the industry. With their ease of use, they offer the perfect balance of security, protection, and simplicity.

Hurricane Protection: Our Accordion Shutters have been thoroughly tested to satisfy strict government requirements (Miami-Dade Building Code, Florida Building Code, Texas Department of Insurance) for protection under severe hurricane conditions. When closed, the system locks, providing protection from high-velocity winds. Storm Shield accordion shutters have been successfully tested to resist hurricane wind loads up to a category 5.

Security: For your home or business, our Accordion Shutters are a major deterrent to crime with no easy pry points for forced entry. Combined with a high security lock that can be operated with key and/or thumbturn, it becomes an impenetrable physical barrier to intruders

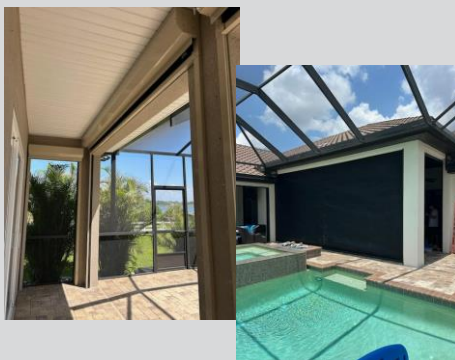

Bahama & Colonial Shutters

Our Bahama and Colonial line can give your house or business the appearance you want with the protection you need. Whether it's that Caribbean flare or the New England look you are after, Zager has a system for you. Our Bahama Shutters provide sun and rain protection while allowing for light control with your choice of 2-inch or 4-inch articulation blades.

Choose from code approved or decorative colonial/Bahama shutters, ask your sales representative which style is right for you.

Our Bahama & Colonial Shutters are Miami-Dade code approved.

Tested to respond to the needs of different markets and the demands of technicians and professionals, we have stringently tested our products for: Wind Resistance, thermal Insulation, Acoustic Insulation and Optical tests on colors.

Armor Screen Roll Up System

Armor Screen is Transparent, Electrical or Manual and Unbelievably Strong. These are perfect for everyday sun, wind & rain protection. Electrical systems can interface with Home Automation Systems. All Armor screen systems are Miami-Dade and Florida Building Code approved. Each is tested to 165 PSF (equivalent to 257 MPH) as well as impervious to Ultra Violet Radiation

Aluminum Rolling Shutters

Our rolling shutters offer code approved hurricane protection at the touch of a button. They provide your home/business with safety, security, and savings with a reliable and user-friendly product.

Zager manufactures the highest quality rolling shutters which are custom made to your specifications. Our industry exclusive matte finish powder coating not only protects against scratching and corrosion, but produces one of the quietest rolling shutters available.

Extruded aluminum shutters provide the ultimate hurricane protection. Our motorized rolling shutters can come with a manual override system that allows our shutters to be operated even through power outages. You can remotely open and close your rolling shutters based on a pre-set time of day or randomly to give the impression of an occupied home.
