AMERICAN ARTISTRY MEETS  
WORLD-CLASS GERMAN PRECISION

UNIQUE  
WOOD CREATION

**A**s a child Jacob Beiler had a passion for wood and a desire to create. Growing up the son of a clock smith, he was no stranger to clocks, but even as youngster you could see he was drawn to woodworking. The family had a small woodworking shop in a barn which his father and older brother used for making crafts and other small projects. Before Jacob was old enough to use the equipment, he was so infatuated with woodworking that he had his older brothers help him cut out pieces so that he could construct an entire toy workshop of his own out of wood.

As Jacob grew older, the play shop was abandoned for the family workshop where he quickly made himself at home making crafts and toys which he sold to family friends. As he grew and became more skilled, the difficulty of his projects increased. His projects turned from crafts to kitchen cabinets, furniture, and in 2009 his first clock.

By 2011, Jacob was out of school and was working for a high-end cabinet maker building custom cabinets. He started **UNIQUE WOOD CREATION** as a side business where he combined his passion for woodworking with his knowledge of clockwork that was passed down from his father. The business blossomed, and by 2014

---

Jacob left his job at the cabinet shop to build clocks full time. By this time the business had grown to a point that Jacob needed help and more space. He moved out of the family workshop to a 7,400 square foot shop where they still operate today.

## UNIQUE WOOD CREATION

continues to grow as more people across the US and worldwide, discover their clocks and what **UNIQUE WOOD CREATION** stands for – an unparalleled drive to create, an uncompromising desire for quality and beauty, and a dedication to customer service.

**Clock cases are crafted in the USA**  
by Unique Wood Creation.

# PRECISION

**B**orrowing knowledge and experience from their father's many years as a clocksmith, Jacob set out to find a mechanical clockworks that would match their uncompromising commitment to quality and beauty. After experimenting with several of the industry's most renowned clockworks, one in particular stood above the rest.

Hermle was founded in 1922 by Franz Hermle in Gosheim Germany, and by 1930 it was one of the most advanced clock production sites in the region. The company set itself apart with the quality of its mechanical clockworks, and that quality quickly caught the attention of other clock makers who began purchasing Hermle clockworks for their own clocks.

---

Accuracy and precision of every component have always been the defining features of Hermle clock works. In the 1970s, the company expanded their business to provide parts for the mechanical and electrical engineering industry, as well as the auto industry.

Today, Hermle is still renowned in the clock world as well as for manufacturing precision parts in various industries. It is companies such as Hermle that give German manufacturing and engineering its famous reputation for quality.

With intensive quality control and a guarantee of smooth operation, Hermle has set the worldwide standard for clock parts.

**A**t UNIQUE WOOD CREATION, we believe in offering the highest quality product from start to finish, which is why, when it comes to finishes, we cut no corners. We offer the complete OCS stain palette as well as custom color matching.

Our finishes are applied by hand in the style of your choosing. Inspection lighting is used before staining to ensure a smooth, blemish-free finish.

But, for those who find beauty in the imperfections, we have developed a distressed finish technique to provide the same charm as the heirloom furniture built decades ago.
