ENERGY EFFICIENCY

R-value 19.40*

For the best thermal performance, select a door with a low U-factor (less heat transfer) or high R-value (more heat resistance) rating.

*DC3200 True White Bead Board only.

Construction

STEEL DC3138/DC3200

Triple-Layer: Steel + Insulation + Steel

For the toughest most energy-efficient steel door, Amarr Designer's Choice triple-layer doors include the ultimate in thermal properties, plus a layer of steel for a finished interior look and added durability.

- Heavy-duty exterior and interior steel
- Durable, reliable, low maintenance
- Environmentally safe polyurethane insulation
- Superior energy efficiency
- Extra quiet operation

¹ Calculated door section R-value is in accordance with DASMA TDS-163.

² It is your responsibility to make sure your garage door meets local building codes.

³ For complete warranty details, visit amarr.com or contact your local Amarr dealer.

Verified thermal performance rating per DASMA Thermal Performance Verification Program.

*Price upcharge applies.

[†] True White Bead Board only.

Colors

Actual paint colors may vary from samples shown. Price upcharge applies to all colors except True White.

Amarr doors are pre-painted; homeowners can use exterior latex paint for custom colors. Visit amarr.com for painting instructions. Non-factory painting of garage door voids the paint finish warranty.

Amarr Color Zone
Over 800 Sherwin-Williams® SnapDry™ paint colors; approved color list is at amarr.com/amarr_color_zone. Visit your local Sherwin-Williams store for paint chips.

Glass Options

Insulated glass* available in Clear, Frost and Dark Tint.

DecraTrim Window Inserts

Window inserts shown on Clear glass; inserts also available with Obscure, Frost and Dark Tint glass.

DecraGlass™ Windows

Tempered obscure glass with baked-on ceramic designs; design visibility varies due to lighting.

Decorative Hardware

Amarr participates in the DASMA Thermal Performance Verification Program. The program verifies the thermal performance of a complete sectional door assembly. The lower the U-factor rating, the better the thermal performance.
