

Three-Wheel Electric Sit-Down Forklift

BT-9U Series

15/18/20BT-9U

3,000-4,000 lbs. capacities

HYUNDAI
MATERIAL HANDLING
NO ONE DELIVERS MORE

Get more of what you're looking for: THE BT-9U FROM HYUNDAI

The BT-9U Series of three wheel forklifts is designed to deliver outstanding maneuverability and performance in narrow aisles and cramped spaces. Beyond this, the BT-9U features outstanding operator comfort and wide array of innovative productivity and safety features. Thanks to its ZF drive package and Electric Power Steering (EPS) system it also offers greater energy efficiency that not only cuts downtime but operating costs. All of this comes in a rugged, durable machine engineered to deliver years of reliable service.

If you're looking for a forklift that can lift your entire business, check out the Hyundai BT-9U.

MULTIFUNCTION CLUSTER OPTIMIZES PERFORMANCE

This advanced LCD monitor clearly displays essential operational information in real time, including speed, travel direction, and operating hours. There's also a load indicator that displays the load weight for greater safety, and more:

- Operators can select performance modes, including High, Normal and Economy, to meet differing work conditions
- This unique system also includes key warnings such as low brake oil and high temperature to safeguard the machine

HIGH-PERFORMANCE LITHIUM-ION BATTERY

The optional Li-ion battery offers rapid charging in just 2 hours and opportunity charging that eliminates the need to swap batteries at shift changes, all while delivering outstanding performance, lower costs, and no daily maintenance, plus:

- Savings on your energy bills, more uptime, and reduced infrastructure costs
- Fast lifting and travel speeds at all levels of discharge while helping to reduce truck component wear

RELIABLE, DURABLE ZF DRIVE PACKAGE

Renowned for its dependability, ZF is a global leader in the manufacturing of powertrains. The BT-9U features a ZF dual drive system that delivers excellent drawbar pull and a short turning radius. The brushless AC motors are virtually maintenance free, and the automatic electric parking brake brings a higher level of safety and require no physical operation.

THREE OPTIMIZED PERFORMANCE MODES

To help you maximize performance and operating efficiency, the BT-9U offers three operating modes—High, Normal, and Economy—that can be set via the digital cluster. The High Performance mode offers fast driving and lifting speeds. The Normal Mode delivers balanced performance and energy consumption. The Economy Mode helps you maximize battery life.

SPACIOUS OPERATOR COMPARTMENT

Operators will discover a compartment designed for greater comfort shift after shift along with controls that minimize fatigue and maximize productivity. Features include a suspension seat that adjusts to the operator's weight, optional fingertip controls, a turtle mode for working in narrow and congested spaces, and optional directional control on the lift lever for quick, precise maneuvering.

HI-MATE MANAGEMENT SYSTEM

Hi-Mate is one of the industry's most advanced remote management system. With continuous data collection, Hi-Mate delivers more communication, control, and ability to track, monitor, maintain, and manage your forklift fleet. It is the proven way to efficiently coordinate both your equipment and human resources.

The BT-9U Series brings you even more advantages.

- Electric Power Steering system operates only when the steering wheel is turned, reducing energy consumption and noise
- ZAPI AC controllers deliver superior driving performance
- Auto fork leveling system helps protect loads and improves productivity
- The BT-9U features easy battery replacement and mounting to reduce downtime
- Load weight indicator offers real-time data on the weight of loads and includes an overload warning for greater safety
- The Operator Presence Sensing System (OPSS) prevents driving, lifting, and tilting when the operator leaves the seat
- Anti-rollback system prevents the machine from rolling back after coming to a stop on inclines or slopes
- Curve control limits travel speed based on the turning radius for smooth, precise operation and greater security for the driver and the load
- Additional safety features include a strong overhead guard, LED lighting package, and an auto parking brake
